

Mockito exercises

Exercise1:

Mocking and Stubbing

```
import org.junit.jupiter.api.Test;
import org.mockito.Mockito;
```

```
import static org.junit.jupiter.api.Assertions.assertEquals;
import static org.mockito.Mockito.when;
```

```
public class MyServiceTest {
    @Test
    public void testExternalApi() {

        // Step 1: Create Mock Object
        ExternalApi mockApi = Mockito.mock(ExternalApi.class);

        // Step 2: Stub Method
        when(mockApi.getData()).thenReturn("Mock Data");

        // Step 3: Inject Mock into Service
        MyService service = new MyService(mockApi);

        // Step 4: Call Service Method
        String result = service.fetchData();

        // Step 5: Verify Result
        assertEquals("Mock Data", result);
    }
}
```

Exercise 2:

Verifying interactions

```
import static org.mockito.Mockito.verify;
```

```
@Test
```

```
public void testVerifyInteraction() {
```

```
    // Create Mock Object
```

```
    ExternalApi mockApi = Mockito.mock(ExternalApi.class);
```

```
    // Inject Mock
```

```
    MyService service = new MyService(mockApi);
```

```
    // Call Method
```

```
    service.fetchData();
```

```
    // Verify Method Call
```

```
    verify(mockApi).getData();
```

```
}
```
